Front End course at Rexcoders Coding Academy.

Have gained knowledge in Web development using HTML 5, CSS 3,Bootstrap, JavaScript, Typescript,Angular .

PROJECTS

Temple website:

Reated my own template with using Angular ,Bootstrap and Firebase. I mentioned that website link in below.
Posted web : https://piracode-sri-dhurgabhadrakali.web.app/
Tech Used   : HTML,CSS, Bootstrap, Angular and Firebase.
E commerce Application:

Developed a E-commerce application using HTML, CSS, JavaScript, Typescript ,which provided a user-friendly interface for customers to add the products in the cart, implemented routing.
Created distinct routes for different sections of the e-commerce application, including product listings, product details, shopping cart, and user account pages. validating forms also performed API integration using http-Client Service. For enhancing the loading time performance, used lazy loading concept.

Github link : https://github.com/vishnusvish/Shop-website/tree/demo
 Tech Used : HTML, CSS, Bootstrap, Typescript, Angular material, Angular
Output :ShoppinCart webSite

LMS-Student Portal:

The LMS Student Portal is an online platform designed to facilitate efficient management of academic schedules, coursework, and other relevant information for students. The portal provides easy access to essential academic resources and helps students stay organized throughout their academic journey
Tech Used: Angular 14, HTML, CSS, Bootstrap.

Personal website:

Role: Designed a personal profile website from starch using HTML, CSS Bootstrap and Java Script for designing.
Output : https://vishnusvish.github.io/personal-web/
Output Video: Personal Website vishnu

Chess Board:
Built a chessboard using HTML,CSS, JavaScript
Output: https://vishnusvish.github.io/Chess/

DECLARATION

I solemnly declare that all the above information is correct to the best ofmy knowledge and belief.

Yours Faithfully
